Northbrook, IL | liam.korol@duke.edu | +1 (847) 209-8333 | www.linkedin.com/in/liamkorol

EDUCATION

Duke University **Fall 2024 – May 2028**

B.S. in Mechanical Engineering; Biomedical Engineering Design Fellow; GPA**:** 3.9/4.0 | ACT: 35/36

Relevant Coursework: Statics, Mechatronics, Thermodynamics, Mechanics of Materials, Medtech Prototyping, Dynamics

EXPERIENCE

A2Z Design — Mechanical Engineering Intern **Summer 2026**

Product Design Firm

- Iterated through multiple chassis concepts and two wheel designs (airless, standard) for an RC dog toy based on client design criteria
- Identified and resolved manufacturability issues in 4 junction box models for an electric VTOL client, built assemblies, and produced BOMs and 13 technical drawings
- Modeled a timed flyer dispenser, assembled and tested 3D-printed prototypes, and iterated to improve functionality and durability
- Engineered drilling jigs, foam inserts, and metal support plates for 35 modified Pelican cases to improve equipment protection

Campus Enterprises LLC — Co-Director of GoBringIt **Spring 2025 – Spring 2026**

Food delivery start-up using Duke's Food Points as payment

- Drove $85K in annual revenue (13% YoY growth) as Co-Director, serving on both the 5-person tech team and 4-person business team
- Led the rollout of real-time tracking and a new driver application, decreasing average delivery times by 35%
- Managed driver scheduling and onboarding while resolving live customer support requests and on-site restaurant issues

PROJECTS

Lightbox **Spring 2026**

Medtech Prototyping Course Project

- Custom-designed a PCB in KiCAD, hand-soldered components, and modeled a 3D-printed enclosure with custom design
- Programmed an interrupt-driven state machine with potentiometers controlling brightness and blink rate

Motorsports — Chassis Team **Fall 2025 – Spring 2026**

Duke FSAE Team

- Spearheaded the design and fabrication of 28 ABS 3D-printed jigs to fix chassis tubes in place during welding
- Built and installed aluminum firewall between the driver seat and the engine, collaborating with team to address safety concerns

Medesign — Mechanical Design Team **Spring 2026**

Biomedical Engineering Club

- Collaborated in design of a wearable, $25 prototype to reduce essential hand tremors using 3 small vibration motors
- Researched tremor biomechanics (4-12 Hz frequency) to inform motor selection; developed a 3D-printed forearm housing

Interactive Pulse Oximetry Teaching Model — Project Lead **Spring 2025**

EGR 101 Course Project for Client Duke Ignite: a local Durham STEM education program

- Developed an educational model to teach local middle school students the scientific principles behind pulse oximetry
- Fabricated an LED-embedded silicone finger to simulate blood oxygenation and a screen displaying saturation values
- Delegated project roles in a 4-person team, co-wrote technical memos, and facilitated client communication and design reviews

LEADERSHIP & EXTRACURRICULARS

Duke Engineers For Global Health — Volunteer **Fall 2025 – Spring 2026**

Community Service Engineering Club

- Repaired and recalibrated donated medical equipment through the Health Equipment Loan Program (HELP) for safe reuse in Durham
- Performed mechanical troubleshooting on wheelchairs, rollators, and walkers to restore safe, functional operation

Shave & Buzz (I'm Not Done Yet Foundation) — Co-President of Shave and Buzz **Spring 2025 – Present**

Philanthropy initiative for Teen and Young Adult Cancer Support

- Led Duke's largest student-run philanthropy initiative, raising $500,000+ for the I'm Not Done Yet Cancer Foundation over two years and securing support from 25+ sponsors including Dollar Shave Club
- Oversaw planning and execution of the Spring 2026 event, overseeing logistics for 450 attendees and 100+ participants shaving heads
- Founded the annual "Mental Health Olympics," driving campus-wide participation and raising $5,000+ for the Jed Foundation

Chabad at Duke Undergraduates — Finance Chair **Fall 2025 – Present**

Jewish Student Religious Organization

- Managed budget and secured funding for weekly religious dinners (200+ attendees), holiday events, and speaker programs
- Directed religious outreach for new students, expanding participation and strengthening Jewish life on campus

ADDITIONAL INFORMATION

- **Engineering Tools:** SolidWorks (Certified SolidWorks Design Associate), Onshape, Arduino, Soldering, ECAD
- **Programming:** Java, Python, Kotlin, C++, React Native, Git
- **Languages:** Upper-intermediate Hebrew, Intermediate Spanish
- **Interests:** Spikeball, Backpacking, Guitar
